

Dear SmartSMBAI Team,

I am writing to apply for the Certified Growth Agent & Territory Reseller opportunity in Africa.

I have a background in software development and technology, and I have also had experience working with businesses and customers through computer sales, repairs, and technology-related services. This has helped me become comfortable explaining technical solutions in simple terms and understanding the practical needs of business owners.

Although my background is not specifically in AI sales, I have a good understanding of modern software and I am familiar with AI tools and basic prompting concepts. I am also a quick learner and would be happy to complete the required certification and learn the SmartSMBAI products thoroughly.

For my local market, I would focus on connecting with small and medium-sized businesses such as computer/technology businesses, hotels, real estate businesses, schools, restaurants, logistics companies, and other service-based businesses that could benefit from automated customer support and lead management.

I am interested in building genuine relationships with businesses and helping them understand how AI can solve practical problems, rather than simply selling a product.

I have attached my CV for your consideration. I would be glad to discuss my background and how I can contribute to SmartSMBAI's growth in the African market.

Thank you for your time and consideration.

Kind regards,

Peter Dumbari
